

The ripple effect

Healthcare Consulting

Letting you focus on the healthcare
you were meant to deliver

Cepheid provides solutions and services to assist organisations. Support is provided by dedicated staff with extensive experience in Lean, Six Sigma, Change Management and Activity Based Costing. Our comprehensive approach increases quality, enhances service and reduces cost by aligning people, processes and technology in a patient centric manner. Consultants at Cepheid can work with you to enhance patient pathways.

Lean

“Doing more with less” is the mantra in Healthcare today. Budgetary constraints, healthcare reforms and funding limitations require a fundamental shift in the healthcare paradigm.

Lean improves the flow of work across the healthcare continuum by identifying, categorising and eliminating non-value added activities. Non-value added activity equates to waste, hidden costs and delays. By removing waste services can effectively do more with fewer resources.

Incorporation of Lean into a service should not be seen as a one off initiative; it is a foundational anchor, built into the quality and improvement agenda to ensure permanence and sustainability.

Workflow Optimisation

Delivering health care involves a complex system of interacting processes; with all relying on each other. Our team analyses how best to bring together people and departments to optimise technology and resources. We can help you to maximize the impact and advantages of new technology and incorporate systems optimisations throughout the healthcare continuum.

Problems In, Solutions Out

In the fast changing field of medicine, yesterday's breakthrough becomes today's limitation. Cepheid's molecular solutions simplify what was once complex.

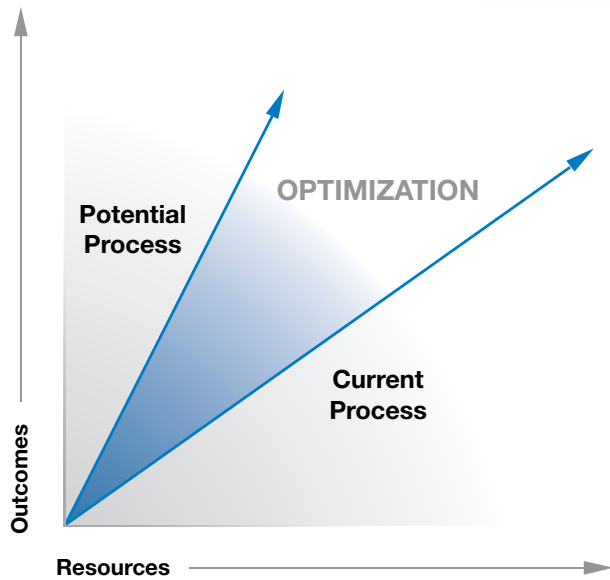

Our technology challenges the old ways of thinking.

Implementing our technology allows enhanced delivery of care beyond the laboratory. Cepheid's Consultants help you capture and quantify these cost-avoidance opportunities with systematic changes and optimal resource effectiveness. We will show you how to deliver results to clinicians when they need them and with a level of accuracy they can rely on.

Customised Service

The team provides a suite of services to drive improvement within the patient focused healthcare continuum. As part of our value-adding services to Cepheid customers, we can tailor engagements specific to your individual needs.

Impact

We use data to drive decision making, allowing for quantifiable resource savings throughout healthcare.

Our Approach

- Addressing critical business issues
- Quantifying the impact of current processes
- Maximising the benefits of technology
- Implementing seamless, integrated process improvements thus improving overall efficiency

Patient Pathway

Let us show you how to create the greatest value across all departments involved in the patient care continuum.

The Healthcare Consulting team combines expertise with leading edge tools and methodologies to analyse and interpret your full care continuum and illustrate solutions that will bring measurable reward.

- Workflow Enhancement
- Lean
- Six Sigma
- Activity Based Costing
- Space and Resource Optimisation
- Change Management
- Information Technology

Please contact your local Cepheid representative to see how we can help you meet your goals.

Cepheid.

The molecular revolution is here.
